

## About Us

**Urban Electric Inc.** is recognized as one of Florida's quality commercial and industrial electrical contractors. Our professional services are available throughout the United States. We have a broad range of capabilities including the engineering and construction of commercial facilities, airfield lighting and navigation systems, federal and industrial systems and facilities.

Urban Electric, Inc. is dedicated to delivering the highest quality workmanship, on time and on budget. Our central offices are located in Altamonte Springs, Florida and our professionals work throughout the United States, dedicated to the success of their assigned projects.

**History** - Established and incorporated in 1994, Urban Electric, Inc. started in the Commercial and Residential Electrical Contracting and Service Industry in the Greater Orlando area.

Urban Electric was purchased by its current ownership in 2001 and a new strategy and market direction was subsequently developed for the company. Throughout the last eight years we have assembled a strong team of professionals with extensive experience on industrial and commercial projects. We expanded our market to cover projects across the United States and shifted our focus to commercial, airport, industrial and federal projects, including engineering and construction (design/build) services.

Urban Electric, Inc. seeks to continue to develop and enhance its reputation as a quality engineering and construction organization with a record of delivering cost effective solutions in a timely manner.

**Team** - Our principal has over 35 years of successful industrial and commercial engineering design and construction experience for projects, worldwide. His background includes CEO for five years of a large privately held west coast environmental, construction, product sales and Real Estate Development Company. He also served as a leading executive for six and a half years for a large NYSE listed environmental contractor with worldwide construction and remediation projects. In addition, he served in senior project and company management positions for over fourteen years with a world class global engineering and construction organization.

Urban Electric, Inc. has assembled a strong, experienced team of Project Managers, Engineers and Superintendents to plan and execute our projects. Their collective experience includes the construction of power plants, refineries, chemical plants, airports, large scale commercial projects and multi-Billion dollar environmental remediation projects for the federal government. However, we supplement our project management team with project appropriate VIRTUAL TEAM MEMBERS including consultants, designers, engineers, specialty contractors, vendors as dictated by the project deliverables and Client specified objectives.

## About Us

**“Safety and Quality”** – Our credo is **“Safety and Quality.”** Urban Electric Inc. consistently completes projects safely with a high construction workmanship quality, on time and on budget. We accomplish this by fostering a safety and quality focused culture that extends from our project managers to our field craftsmen and team vendors and subcontractors.

To constantly reinforce the importance of creating and operating a safe work zone, all of our superintendents complete mandatory 30 hour OSHA safety courses. Our team’s training and commitment to following and promoting all safety regulations ensures the safety of our team and contributes to the safety of the entire jobsite. We take safety seriously and as a result have maintained a spotless safety record since our founding 14+ years ago.

Urban Electric’s quality focus influences the entire spectrum of our operations. Adherence to project design and specifications, conformance to manufacturers’ installation procedures, pro-active quality assurance and control during the construction process, testing and documentation of installed systems, etc., are all standard operating practices. Our excellent workmanship, detailed project documentation, and responsiveness on the administrative front have thoroughly satisfied our private, commercial, and federal clients.

Our project managers, superintendents, engineers, and craft employees recognize the importance of planning and scheduling, meeting deadlines, and professionalism when interfacing with clients, inspectors, A/Es, team vendors and contractors.

Urban Electric acquires and provides the knowledge and expertise to meet the needs of the most demanding client. We custom develop the right “virtual project teams” tailored and suited to the needs of each project. This virtual project team may be composed of : local/national engineers and designers; local/national vendors and specialty subcontractors; and local/national construction equipment suppliers, with the purpose to become the most appropriate, cost effective and efficient project execution team.

From ground up engineering and construction, to renovations and upgrades, we get the job done right.
